ABOUT ME:

- I am a self-motivated person with positive and dynamic thinking and I believe in stretching my capabilities in achieving my goals.
- Consistent upward movement is important to me and hence I keep exploring new avenues and visions that help me achieve my goals and explore my potentials.
- Career is important to me and hence my biggest challenge is in the most realistic manner smartly balances my professional and personal ends by optimizing the most perishable resource time.
- I hold 20 years of Industry Experience which details as follows with 14 years in MI, Analytics, CEM Implementation, 4 years in Risk and Claim and 2 years with Sales.

PROFESSIONAL ACHIEVEMENT:

- Awarded "**ASPIRE 2 INSPIRE**" for valuable contribution towards successful implementation of Govt. Business Schemes as part of Risk Management, year 2019
- Awarded "**RGICL LEAD PERFORMER**" year 2018
- Winner of "**Case Study Documentation Competition**" for DEC 2008 for Effective Reduction of Aux (Timeout) impacting projects revenue.
- Awarded "**EXTRA MILLER**" for higher levels of Performance & Commitment by **DGM Operations, Sep 2007.**
- Awarded "**CERTIFICATE OF MERIT**" for successfully completion of ICICI OneSource Way assessments by **President and COO, 2005 – 06.**
- Awarded Certificate for successfully completion of Six Sigma "**YELLOW BELT TRAINING**" by **DGM - Process Excellence, 12th June 2006.**
- Awarded "**CERTIFICATE OF EXCELLENCE**" by **SR. VICE PRESIDENT: SERVICE DELIVERY & VICE PRESIDENT: HUMAN RESOURCE, 1st April 2003**
 - ✓ As a token of appreciation was selected for "**FAST TRACK INTERNAL GROWTH PROGRAM**".
 - ✓ As well Company sponsored "**MBA PROGRAM**" from Welinkars Institute of Mgmt Studies
- Awarded "**STAR CUSTOMER RESPONSE EXECUTIVE**" for achieving best Average Speed of Answer (ASA), with minimum Contacts Per Hour (CPH) and better Quality & Accuracy on all deliverables.
- Was awarded "**OUTSTANDING TEAM**" for establishing a new record in Credit Card Application Collection (1200 per month) and achieving an Activation % (of 83% per month).

WORK EXPERIENCE:

COMPANY	Reliance General Insurance Company Ltd
DESIGNATION / SPAN	Associate Segment Head – Govt Business (Span of Control – 8 Managers)
REPORTING TO	National Manager – Risk and Claims – Agri Business
TENURE	19th Dec 16 – 30th Aug 21

KEY JOB RESPONSIBILITIES:

- **Owner of Agri Business Central Team – domains handled Risk and Claims**

Risk Management

- For effective Risk Management strategize annual plan post confirmation of business where key aspects like – Manpower, Vendor Support, Systems etc. are rightly sized
- Conduct effective trainings for new joiners and refreshers for existing manpower where process gaps, system inefficiencies are plugged to the most and best practices are replicated across regions
- Monitor and Control - Pan India performance with single dashboard designed to monitor key variables of business by all levels of Management
- With Vendor support create specific reports for critical regions, which help better understand the possible impact and document and record causatives for proper evaluation of loss
 - a. These reports form a single report of evidence that helps RGICL in settlement of disputes with Govt. Of India
- For Micromanagement - Design and Deploy Trackers for each region, review them weekly and report on the shortcomings and achievements
- Design Reports that monitor the performance, productivity on regular intervals for Internal consumption and External reporting to Govt.
- Design Standard Operating Process (SOP) to improve productivity and achieve excellence

Claim Management

- Claim provision approving authority up to 1Cr, and certified Quality Check approver for claims above 1 Cr.
- Conduct weekly reviews to check, control and monitor Claims for multiple regions which ensures fixing of any missed considerations, thus smooth processing of claims

Other Activities

- Prepare Annual Budget review
- Invite and interact with New Vendors on Satellite Analytics, Agri Insurance business monitoring etc.
- Initiate Simulations Projects with Government of India with RGICL – Domain Knowledge Experts and Underwriting Team – Focusing on finding new ways to improve claim calculation involving Satellite Analytics

COMPANY	HDFC ERGO General Insurance Company Ltd
DESIGNATION / SPAN	Manager
REPORTING TO	Asst. Vice President – Project Management
TENURE	26th Dec 11 – 26th Aug 16
SYSTEMS worked with	○ Qlikview. ○ Talisma – Customer Relationship Management (CRM) ○ Cosmocom – Call Management System (CMS) ○ Genisys (GC) etc.
KEY JOB RESPONSIBILITIES:	
<u>ANALYST & MIS</u> ▪ Constantly coordinate with Central Data Warehouse team for various data cuts basis upcoming business requirement and automate fully or partially requirements. ▪ Further effectively mine Business / CRM / CMS data with inbuilt Accuracy checks to ensure data used for Business Analytics is close to accurate and the same can be used for effective decision making by the Sr. Management Team. ▪ Ensure all performance reports are timely generated and shared with respective stakeholders ▪ Design Standard Operating Process (SOP) for standardization of MIS Processes which ensures timely receipt of critical data inputs from respective departments for generation of key business reports. ▪ Parallel Initiate projects by which the company data is structured effectively to meet the strategic business objectives of the company. ▪ Design dashboards on key business parameters that provide daily/weekly/monthly update on their trends, thus ensure proactive steps are taken by business against negative variances before time. ▪ Train new Executive – MIS on existing processes and Update executives on change. ▪ Effectively coordinate and implement change management. ▪ Analyze existing productive data and highlight outliers to Management / Operational / Sales / Claims Teams. KEY HIGHLIGHTS / ACHIEVEMENTS: - ▪ Owner of "NET PROMOTOR SCORE (NPS)" which aims at improving "Service Delivery" on all key process like Policy Issuance, Endorsement, Claims, Call Center (Phone and Email) and Company Level. ▪ Achievement: Automated "NPS Dashboard" a. Where the data is sourced from Core and Allied support systems to give a single view of performance trend on the above parameter. Systems used i. Core Systems : GC / Mirus ii. Allied System: Talisma (CRM) / Cosmocom (CMS) iii. Dashboard: Qlikview b. Drilldown cuts are available on Company–Claims / Servicing Perspective, Vertical / Region / Sales Manager Wise etc. c. Service Delivery Outliers are weekly analyzed and necessary corrective steps	

are taken in the form of major process change, or policy workings are reviewed, or automated Email / SMS campaigns are tweaked basis product requirement etc.

- d. Dashboard provides reviewer a single window view of the customer's servicing life cycle since the time he is with the company, this helping to quickly identify the gaps in sourcing / servicing and thus bridge the same by way of effective process implementations.
- e. **IMP:** Data inputs of External Survey conducted Quarterly by our business partner "ERGO International" too is integrated.

- PPGRC Board presentation on Complaints / Grievances is made which provides Industry comparison trend on C&G.
- New Assignment: SPOC for effective Email Marketing Campaign, software used EMM

- **"Sports Secretary of the College"** for the year 1997-99.
- Directed a **"Musical Parade"**, theme **"Dowry"** at inter-collegiate competition and were awarded **"Second Runner Up"**, Year 1997 – 1998.

Sanjay Sawant
(9930268919)

Job Summary: -

This role focuses on strategic risk and claim management for large-scale agricultural insurance operations. Key responsibilities include designing Pan-India monitoring frameworks, overseeing claim approvals up to ₹ x Cr, and developing Standard Operating Procedures (SOPs) to optimize productivity. The position involves high-level vendor management for satellite analytics, budget planning, and collaborating with the Government of India on simulation projects to refine claim calculation methodologies and resolve disputes.

Key Skills

Strategic & Operational Leadership included: Strategic Planning, Process Engineering (SOP Design), Performance Monitoring, Budgeting & Financial Review

Technical & Domain Expertise included: Agri-Insurance & Satellite Analytics, Claim Management, Data Modelling & Simulation, Micromanagement Tools.

Stakeholder & Regulatory Management included: Vendor Management, Government Liaison through Liaising team, Reporting (Internal & External)

Soft Skills included: Training & Mentorship, Analytical Thinking, Negotiation & Dispute Resolution

Based on the profile provided, the key skills are categorized as follows for 2026:

Strategic & Operational Leadership

- **Strategic Planning:** Ability to design annual risk management plans aligned with business goals, ensuring resources like manpower and systems are rightly sized.
- **Process Engineering (SOP Design):** Designing and deploying **Standard Operating Procedures (SOPs)** to drive productivity and operational excellence.
- **Performance Monitoring:** Expert in Pan-India performance tracking using single-view dashboards to monitor critical business variables.
- **Budgeting & Financial Review:** Preparing and reviewing annual budgets and performing financial analysis for agricultural insurance business monitoring.

Technical & Domain Expertise

- **Agri-Insurance & Satellite Analytics:** Advanced knowledge of **Agri Insurance** and the application of **Satellite Analytics** for crop monitoring and claim calculation.

- **Claim Management:** Authority to approve high-value claim provisions (up to ₹1 Cr) and perform quality checks on complex claims.
- **Data Modeling & Simulation:** Leading simulation projects with government bodies to innovate claim calculation methods using predictive analytics.
- **Micromanagement Tools:** Designing and reviewing weekly trackers and regional reports to identify and address shortcomings.

Stakeholder & Regulatory Management

- **Government Liaison:** Interacting with the **Government of India** for dispute resolution and high-level project collaboration.
- **Vendor Management:** Strategizing with and inviting new vendors for technical support, specifically in satellite analytics and critical regional reporting.
- **Reporting (Internal & External):** Designing evidence-based reports for internal management consumption and mandatory external reporting to government entities.

Soft Skills

- **Training & Mentorship:** Conducting effective training sessions for new joiners and refreshers to plug process gaps and replicate best practices.
- **Analytical Thinking:** Identifying process inefficiencies and system gaps through rigorous review of weekly and regional data.
- **Negotiation & Dispute Resolution:** Representing the organization in settlements and technical disputes with government stakeholders.

HDFC ERGO

This role involves serving as a Data Analyst & MIS specialist, responsible for managing the end-to-end data lifecycle to support strategic business decisions and improve customer service delivery. Key responsibilities include coordinating with the Central Data Warehouse team, mining and structuring data with a strong emphasis on accuracy, and automating reporting processes.

The position requires designing dashboards using tools like **QlikView** to monitor key performance indicators (KPIs) such as the **Net Promoter Score (NPS)**. The analyst uses these dashboards to identify outliers in service delivery (across policy issuance, claims, and call centers), implement change management, and coordinate corrective actions through process reviews or marketing campaigns. The role also includes creating SOPs for standardized reporting, training new staff, and preparing high-level presentations for board review.

SKILLS

Based on the Analyst & MIS profile, the key skills for 2026 are categorized into technical proficiency, strategic data management, and operational leadership.

Technical & Data Engineering

- **Data Mining & Accuracy:** Expertise in mining complex **Business, CRM (Talisma), and CMS (Cosmocom)** data with rigorous inbuilt accuracy checks to support high-level decision-making.
- **BI & Dashboard Development:** Advanced skills in **QlikView** for designing automated, multi-dimensional dashboards that track key parameters like trends and outliers.
- **Automation:** Ability to collaborate with Central Data Warehouse teams to fully or partially automate data cuts and reporting processes.
- **Data Structuring:** Leading projects to effectively structure company data to align with long-term strategic business objectives.

Operational & Process Management

- **SOP Design:** Standardizing MIS processes through **Standard Operating Procedures (SOPs)** to ensure the timely receipt and generation of critical data inputs.
- **Change Management:** Effectively coordinating and implementing organizational changes, particularly those affecting data systems and reporting workflows.
- **Performance Monitoring:** Generating daily, weekly, and monthly reports that track performance trends and provide early warnings for negative variances.
- **Training & Mentorship:** Training new MIS executives on existing processes and ensuring they remain updated on systemic or procedural changes.

Customer Experience & Strategic Analytics

- **NPS Ownership:** Specialized in managing the **Net Promoter Score (NPS)** lifecycle, aiming to improve service delivery across Policy Issuance, Claims, and Call Centers.
- **Service Lifecycle Analytics:** Providing a single-window view of the customer's sourcing and servicing lifecycle to identify and bridge gaps in the customer journey.
- **Strategic Reporting:** Preparing high-level presentations (e.g., PPGR Board presentations) that include industry comparison trends on complaints and grievances.
- **Digital Marketing Analytics:** Serving as the Single Point of Contact (SPOC) for **Email Marketing Campaigns** using specialized software like EMM.

Soft Skills

- **Cross-Functional Coordination:** Acting as a bridge between technical warehouse teams and operational stakeholders like Sales, Claims, and Senior Management.
- **Analytical Reasoning:** Identifying and highlighting "productive data outliers" to various teams to trigger proactive corrective actions.
- **Storytelling with Data:** Translating complex data into meaningful insights and business "narratives" for board-level consumption.

OUR WORK - Insurance

Objective: Support the organization's growth by preparing the young talent to take on future roles (Brand as Blue League)

Solution: Designed and implemented a two-phased diagnostic approach to identify the high potential talent from a pool of 300 employees. In phase one, baseline high potential identification assessments were deployed followed by conducting an engaging development centre in Phase 2.

Outcome: Top 50 high potential young talent was identified, who are currently undergoing a development journey.

Objective: Enable the first time managers (FTMs) to understand the importance of their mindsets and to develop them on core focus areas for the organization such as communication, & delivery excellence. Approximately 600 FTMs were covered across batches.

Solution: 3-day workshop was designed to develop the first time managers. It allowed the participants to reflect on their mindsets and acquire the skill-sets to be more effective managers.

Outcome: The program participation and engagement has been north of 47. The participants have found the content very relatable

Objective: Sensitize and prepare 1000+ people managers for their upcoming performance management cycles.

Solution: Designed and delivered virtual instructor led sessions based on identified focus areas.

Outcome: Engaging program that enabled a good segue into the performance conversations as part of the performance management cycle at Max Life.

Guidelines for this Assessment

- 

The assessment consists of a set of multi-choice questions. Select the option that you relate to the most. It is advised to select responses that first come to your mind.
- 

While taking the test, sit in an environment that is free from distractions and noise.
- 

It is recommended to complete the inventory in one sitting.
- 

All questions are compulsory.
- 

Please note that this is not a timed assessment.
- 

This assessment is not aimed at measuring your current on-the-job performance.

PAVE LEADERSHIP SURVEY

Mode of Administration: Online

Duration: 30-40 Mins (Untimed)

Based on **Leadership Styles Theory presented by Daniel Goleman**, a pioneer in the field of Leadership and Emotional Intelligence.

The PAVE Leadership assessment taps into an individual's approach towards leadership.

The screenshot shows the JOMBAY PAVE LEADERSHIP SURVEY interface. It displays two questions with radio button options for 'Strongly Disagree'.

CASE STUDY

Mode of Administration: Online

Duration: 60 Mins (Timed)

Participants will be provided with a hypothetical business case study. The case will involve questions related to people, operations, business and customers challenges.

The participants need to write detailed subjective responses to these questions. The purpose of the assessment is to evaluate how the participants understand the business environment and accordingly recommend solutions.

The screenshot shows the JOMBAY CASE STUDY interface. It displays a business scenario and two questions.

CASE STUDY

The Situation

You are to assume the role of the recently appointed Regional Director in Choco Bliss International (CBI), a growing global confectionary company. As part of CBI's vision to expand its market share over the next 5 years, the Board is launching a new brand of chocolate bars in the country of Palzag in the next 9 months. This range of chocolate bars, which contains 7 different bars with 7 different flavors, should create a big impact with its target consumers, who it is intended will switch to this range from other competing products.

The New Range

The 7 bars are as follows:

- Dark Chocolate
- Milk Chocolate
- White Chocolate
- Dark Chocolate with Mint
- Dark Chocolate with Orange
- Milk Chocolate with Peanut Butter

Your Task

The Board has asked you to provide your recommendations about the launch of the range by answering few critical questions at the end of this case. Your recommendations should be as

QUESTIONS

Q1. What do you think about the launching of a new brand of chocolate

Q2. Based on the information above, what will be your overall strategy to

Write your response here...

Q3. Outline an implementation plan of the major project steps you envisage.

Be elaborative why this decision.

SecureLife Insurance

The Situation

You are a Functional Lead at SecureLife Insurance, a prominent general insurance provider with a significant presence across India. Reporting directly to the Chief Digital Officer, your role involves leading a cross-functional team unit, analyzing unit performance, developing strategic initiatives, and presenting these to senior leadership. Your cross-functional team includes three key team members: Meera Desai (Customer Experience Lead), Priya Sharma (Senior Relationship Manager), and Rajesh Kumar (Technology Lead), each bringing specialized expertise to the organization's transformation initiatives.

Recently, SecureLife Insurance launched a Customer Experience Innovation Center (CEIC) – a strategic move to transform from a backend-focused operation into a customer-centric organization offering personalized insurance solutions and consultative services. However, the center has encountered substantial implementation challenges that threaten its strategic objectives and competitive positioning. Your immediate challenge is to address these implementation issues while ensuring the CEIC achieves the innovation excellence and operational effectiveness required to compete in the rapidly evolving insurance landscape.

Introduction to SecureLife Insurance

SecureLife Insurance is a leading general insurance provider serving over 2.5 million policyholders across India through 47 branches in 23 states. Headquartered in Mumbai with regional offices in Delhi, Bangalore, and Kolkata, the company built its reputation through reliable claims processing, operational efficiency, and competitive pricing in traditional insurance segments, including motor, health, property, and liability coverage.

Historically, SecureLife operated as a backend-focused organization where teams handled policy administration, underwriting, and claims processing with standardized product offerings distributed through agents and brokers. Customer interactions were primarily transactional, occurring at the point of sale or during claims, with minimal ongoing relationship management.

As competition from insurtech startups like NexaCover and VelocityInsure intensified, SecureLife recognized that customers increasingly expected seamless digital experiences, personalized coverage recommendations, and proactive risk management guidance. To address these market dynamics, SecureLife created the Customer Experience Innovation Center to offer personalized insurance solutions and help customers navigate complex coverage decisions through digital transformation.

1. The CEIC's ₹22 crore technology investment has stalled with teams recommending an 18-month implementation using basic systems, while competitors achieved similar transformations in 6-8 months. Customer acquisition costs remain 40% higher, three major clients have been lost, and the CEIC relies on historical data while competitors use real-time analytics. What specific steps would you take to evaluate this investment and develop an innovative market approach to compete with NexaCover and VelocityInsure?

This is a mandatory question. Type your response
